

# WAGES OF SIN

Sensational Case of Three Persons Charged With Murder.

# SCANDAL IN HIGH LIFE

The Murder Was the Result of the Intimacy of a Doctor and the Wife of a Prominent Citizen, Who Was Slain by the Doctor and His Accomplices.

The Saylor case, which is now on trial at Watseka, Ill., is one of the most sensational murder cases ever tried in that State. The intensity of the interest taken by the community in the case is due not only to the sensational details of the crime and of the conditions which led to it, but also to the fact that the murdered man and those accused of being his slayers and their respective relatives are known to everybody throughout Illinois county and even beyond its limits.

Immediately after the crime was committed, on July 11, 1909, popular feeling in the county was so strong, that it would have been practically impossible to obtain a jury of twelve unbiased men to try the three persons charged with the murder. But since then the excitement has cooled down considerably and it is believed that the selection of the jury will not be exceedingly difficult. The accused, having wealthy family connections, will be represented by the ablest counsel that money could procure and no effort will be spared to save them from conviction, which would mean hanging or life-long imprisonment.

The persons to be tried for the murder of John Byron Saylor, the Crescent City banker and live stock broker, are Dr. William F. Miller, Mrs. Lucy Saylor, the widow of the murdered man and her father, John Grunder. Ira Grunder, a brother of Mrs. Saylor, is also under indictment but merely as an accessory after the fact. Eate's attorney John C. Palissard will conduct the prosecution and he professes to feel sure of the conviction of the accused.

John Byron Saylor was killed in his own house by William R. Miller about ten o'clock on the night of July 11, 1909. The defense will claim that the deed was an act of self defense and that Dr. Miller did not fire the fatal shots until after Saylor had attacked with a hatchet. The prosecution, however, will try to prove that the act was premeditated murder and was the result of a conspiracy between Dr. Miller, Mrs. Saylor and her father.

It appears that for many years, Dr. Miller and Mrs. Saylor entertained intimate relations which were the talk of the town and caused the community socially to ostracize both the doctor and his affinity. It is known that Saylor, the victim of the murder, had knowledge of the relations existing between his wife and Dr. Miller for many years, but that for the sake of his daughter he refrained from taking legal steps to obtain a divorce.

Dr. Miller's wife, a lovable and highly respected woman, also knew of the scandalous relations of her husband, but would not seek separation, fearing that the scandal connected with a divorce suit would blight the life of her boy.

It is said that Dr. Miller and his affinity made several attempts to rid themselves of their respective legal partners and even tried to inveigle Saylor into the appearance of an entanglement with Mrs. Miller, but failed in every instance. It is believed and will be charged by the prosecution that becoming desparate the doctor and his affinity resorted to the extreme remedy of killing the man who stood in their way.

What happened at the Saylor residence on the night of the murder only the persons charged with the murder know. They claim that Saylor came into the room in which Mrs. Saylor, her father and Dr. Miller were about to play a game of cards, that they urged him to join the game, but that he refused and without further provocation attacked Dr. Miller with a hatchet.

They insist that Dr. Miller merely acted in self defense when he shot Saylor. Witnesses who entered the room of the murder shortly after the shooting, assert that there was no hatchet in the room at that time and that one was found there, it must have been placed there later in an attempt to manufacture evidence.

# ROBBED IN THE STREET.

held up Woman and Child in the Centre of Charlotte.

At Charlotte, N. C., and on one of the principal streets, negroes Saturday held up and assaulted a white woman and child and robbed them of their pocket books, containing \$5. These bold robbers came as the climax to a long series of nightly hold-ups in which women have been invariably the victims. On the boulevard in Dilworth Friday morning, an aged woman was knocked down and severely hurt, the gro escaping with the woman's pocketbook. That afternoon on the street of the city a child was knocked down and robbed of a purse. The police chased both criminals with automobiles and automobiles and led two arrests. Great crowds followed the prisoners to the station, and no violence was attempted, although for a time great excitement reigned.

They call it embarking on the matrimony, but unless Eleanor son stays hitched up to August, not longer than the marriages of most actresses, we should call it a trial of matrimony.

# HELPED FARMER

THE GENERAL ASSEMBLY DID A GOOD DEAL FOR THEM.

It Gave Money to Support Various Things that the Farmers of the State Needs.

Farmers have no reason to complain of their treatment at the hands of the bills enacted into law surveys of the General Assembly adopted this session some very progressive and diversified legislation. Provision was made for the inspection of commercial foodstuffs, the income to go to the Department of Agriculture, commerce and industry, of which Col. E. J. Watson is the aggressive head.

A special appropriation of \$4,000 for the general expenses of the department was also given, this being a splendid recognition of Col. Watson's untiring and successful efforts for the development of the State.

An up-to-date pure seeds law based upon the Wisconsin statute was also adopted.

For the farm demonstration work, so successfully managed in the State by Mr. Ira W. Williams, an appropriation of \$5,000 to supplement the national appropriation was made—a good example for other States.

For the great corn show to be held in Columbia this fall \$1,000 was given, conditioned upon \$4,000 being raised in the State at large. And this is assured, Mr. A. E. Gonzales, having pledged \$1,000 of the amount. It is also gratifying to note that the Legislature appropriated \$500 for the support of the work of the State Corn Breeders' Association, which works along the lines of the most progressive of such organizations in the West.

# WANTS ALL HIS WAGES.

Bride Takes Her Hubby to Court for Keeping Thirty Cents.

"When I married Sam," said Mrs. Fanny Bookbinder in a New York police court, "he promised to provide for me and Saturday night his pay envelope was 30 cents short." Mrs. Bookbinder is a bride of eight days. Although she has a personal bank account of \$1,000, which she refuses to share with Sam, she hauled him into court on representations that he had treated her cruelly.

"Sam make \$20 a week," she continued, "and I want every cent of it. If he needs anything I'll get it for him. I know what's due a wife and that's why I brought him here."

"Suppose your husband wants a cigar?" suggested the magistrate.

"I'll buy it for him," repeated Mrs. Bookbinder firmly.

The magistrate laughed outright. "Then go home and make up your mind," he said, "to do as your husband tells you and take what he gives you. And don't you come before me again with such ridiculous charges. Case dismissed."

The pair left court, arm in arm, and there was no sign of a cloud to dim their honeymoon.

# YOUTHFUL BIGAMIST.

Is Only Twenty-One Years of Age Has Three Wives.

The first case taken up in the Greenwood court last week was that of the state against George H. Moseley, charged with bigamy. The defendant, pleaded guilty and was given a sentence of one year in the penitentiary. This case is rather interesting in view of the fact that the young man is only twenty-one years old and has been married three times. He married the first time in Honea Path, the second time at Greenwood, and the last time at Ninety-Six, all of the towns being in a radius of about twenty-six miles. Two of his wives were in court Monday; but did not get the opportunity to testify in view of the fact that the defendant pleaded guilty. The minister who performed the ceremony in each case, was also present.

# Mistaken the Symptoms.

The so-called religious man who goes about with a long face and his lip hanging down over his chin, has mistaken a case of dyspepsia for a change of heart. The true Christian has a ready made smile always on top and is glad in heart all the day long, from January 1, till the general judgment.

# Actor Kills Himself.

At Chicago Thos. Thorne, an actor, killed himself in his room Friday while despondent. He used the thick cord of his bathrobe, tying one end around his neck and the other to a door hinge. Thorne's home was in New York, where he was a member of the Lambs club.

# Shoots Daughter and Self.

At Mankato, Minn., Robert Pfeffer, enraptured because his daughter Maude accepted attentions from a young man to whom the father objected, shot the girl Friday night and fired two bullets into his own breast. The father probably will die, while the girl may recover.

# Heavy Snow.

Twelve inches of snow covered the decks of the steamer Columbus arriving at New York from Savannah. The Columbus ran into a violent storm, off the Delaware capes, with a heavy fall of snow.

Some 275,000,000 sent abroad annually by immigrants, says the Immigration Commission. If Uncle Sam's boys were not too proud to get their hands soiled, we would not have to be supporting some other fellow's father over the sea.

# WILL INSPECT SEED

GETTING READY TO MAKE WAR ON THE BOLL WEEVIL.

The Law Recently Passed by the Legislature About Seed Inspection to Be Enforced.

A conference of the seed houses will be called to meet soon to discuss the act passed at the last session of the general assembly calling for the inspection of all seed sold in this state, J. N. Harper of Clemson college was in Columbia Thursday for a conference with Commissioner Watson. Prof. Harper has already commenced the preparations for the inspection of the seed at the experiment station. Microscopic tests will be made. The act provides in part as follows:

Section 1. That on and after the approval of this act, no person, firm or corporation shall by himself or themselves, his or their agents or representatives of any persons, firms or corporations, sell or offer for sale or distribution within the State of South Carolina, for seedling purposes, any lot or package of agricultural seeds exceeding one pound in weight unless the same, when put in either open or closed packages, shall have attached thereto a label on which is plainly printed or written in the English language the following: (1) Name and kind of seed. (2) Statement of purity of seed contained therein. (3) Germinating power of seed. (4) Locality where seed was grown if known.

Sec. 2. For the purpose of this act the term "agricultural seeds" shall include seed of the red clover, white clover, alfalfa, burr clover, crimson clover, lespedeza, alfalfa, timothy, orchard grass, Kentucky blue grass, red top, bromus inermis, oat grass, fescues, the millets, the vetches, other grass and forage plant seeds, flax, rape, sorghum, rye, barley and other cereals and cotton.

Sec. 3. No agricultural seeds, as defined in section 2, shall be sold or offered for sale or distributed within the State which contain in greater numbers than 30 to 1,000 seeds under examination, the seeds of such noxious weeds as clover dodder, field dodder, white mustard, wild oats and such other weeds as may be designated in the regulations promulgated by the state department of agriculture and the state experiment station. Where the seeds of the weeds so designated are presented in fewer numbers than 30 to 1,000 of the seed being examined a statement shall be made on the label attached to the package numbering the weed seeds present therein.

Sec. 4. The seeds of such weeds as sheep sorrel, green and yellow fox tail, yellow trefoil, chick-weed and such other weeds as may be prescribed in the regulations adopted by the state department of agriculture and the state experiment station, and stated in circulars, shall be classed as impurities in agricultural seeds. When such impurities or any of them present in quantity exceeding 3 per cent of said agricultural seeds the approximate percentage of each shall be plainly stated on the bag attached as specified in section 1.

Section 5. Sand, dirt, sticks, broken seeds, other seeds than those mentioned in the foregoing sections, or any other foreign matter, shall be considered as impurities when mixed with agricultural seeds sold, offered or exposed for sale in this State for seedling purposes. When such impurities are present in seeds exceeding the standard fixed in the regulations of the state department of agriculture and the state experiment station the name and approximate percentage of each shall be stated on the label as specified in section 1.

Sec. 6. The department of agriculture and the state experiment station are hereby empowered to prescribe regulations designating when seeds shall be considered mixed or adulterated or misbranded and as germinating power standard.

Sec. 7. The provisions of this act shall not be construed as applying to:

(1) Any person growing, possessing for sale or selling for food purposes only.

(2) Persons selling seeds containing impurities except as defined in the regulations, providing such seeds are sold to merchants to be recleaned before exposing for sale upon the general market.

(3) Seed that is in store for the purpose of recleaning and which is not possessed, sold or offered for sale for seed purposes.

(4) Cereals, grown or sold and delivered from the farm by the owner thereof, buyer himself to use the seed for seedling purposes, or for resale to local merchants, who may resell.

(5) Mixtures of seeds for lawn purposes except that the sale of such mixtures is subject to restrictions and regulations made therefore by the department of agriculture and the state experiment station.

Sec. 8. For the purpose of this act seed shall be deemed pure when it complies with the foregoing provisions and contains no communicable disease.

The enforcement of this provision is left with the commissioner of agriculture.

The act further says:

"Sec. 9. The enforcement of the provisions of this act is hereby placed under the direction of the commissioner of agriculture, commerce and industries of South Carolina, and he is hereby empowered to appoint such inspectors and assistants as may be necessary to execute its provisions. All examinations of seeds shall be done at the State experiment station under the supervision of the director thereof and from the funds raised by this act upon the approval of the commissioner of agriculture, commerce and industries the expenses of examination shall be paid by

# PATTEN MOBBED

IN THE MANCHESTER COTTON EXCHANGE.

While Unhurt Mr. Patten Was Greatly Chagrined by Display of Hostility to Him in Manchester.

A hostile demonstration on the floor of the cotton exchange at Manchester, England, and one directly contrasting it for friendliness on the corn exchange at Liverpool were met with Friday by James A. Patten, the Chicago wheat and cotton operator. In the first Mr. Patten was mobbed and probably escaped injury only by being rescued by the police; in the latter he was greeted with cheers and other manifestations of friendliness. Mr. Patten sailed from Liverpool Saturday for New York on board the Cunard line steamer Mauretania.

The brief visit to England of the Chicago operator has been spent mostly about the Liverpool markets and Friday he made up his mind to run over to Manchester to see the city and visit the cotton exchange. It was known to Mr. Patten that there had been threats of an unpleasant reception should he visit "Cottonopolis," but he refused to believe these threats would be carried into effect. These threats, it is said, emanated from persons on the exchange who had lost large sums as a result of Mr. Patten's operations in Chicago, and from others, who held him responsible for Thursday's rise in the price of cotton and who believed that his visit to England had for its purpose the manipulation of the market.

Hardly had Mr. Patten touched the floor of the Manchester exchange before the outburst came. He was hooted and jeered by the throng and then surrounded and hustled into the street. The crowd followed even here and did not desist its manifestation of dislike until the American had been placed in a cab by the police and started for the railway station, where he took the first train back to Liverpool. While unhurt he was greatly surprised and irritated at the dislike the people of Manchester had shown for him.

Arriving in Liverpool, Mr. Patten just had time to visit the corn exchange before it closed for the day. The floor was crowded with members, who evinced their sympathy for him for the treatment that had been shown him in Manchester by taking off their hats and cheering him when he referred to the incident.

# BIG SALE OF FERTILIZERS.

Forty-Eight Thousand Tons More Sold This Year.

The farmers of the State, according to the number of tag tags sold, are using more fertilizer this year than in the past, says the Columbia State. The books in the State treasurer's office show that since the first of the year the sum of \$154,467.38 has been received for tags.

This is over \$12,000 more, than was received at this time last year. The amount received to date last year was \$142,147.37. The total amount received from the fertilizer tag tags last year was \$202,741.31. This money goes to Clemson college. There is a tax of 25 cents on every ton of fertilizer sold in the State.

It was said Thursday that the fertilizer company's act rushing all orders and the fact may account for the increased sale, but it is believed that the growth of intensive farming is the real cause. According to the amount of tag tag money received, it shows that over 600,000 tons of fertilizers have been sold in the State since the first day of the year.

The State.

"Sec. 10. It shall be the duty of the inspectors and assistants to collect samples of agricultural seeds in the open market and forward same to the experiment station, where they shall be examined and analyzed in conformity with the provisions of this act and the standards fixed by the regulations provided for herein. The inspectors and assistants are vested with all necessary powers for the proper execution of their duties and to note all violations of any provisions of this act and to bring action in the proper court or tribunal for prosecution of such violation when directed so by the commissioner of agriculture, commerce and industries.

"Sec. 11. The results of all tests of seeds made by the experiment station shall be published in bulletins of the department or the station, together with the names and postoffice addresses of the persons, firms or corporations from whom all samples tested were obtained.

"Section 12. For the purposes of this act a sample of agriculture seed shall consist of not more than four nor less than two ounces of the seed to be examined.

"Sec. 13. Whoever violates any provisions named in the section of this act, or who shall attempt to interfere with the inspectors or assistants in the discharge of the duties named herein shall be deemed guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than \$10 or more than \$50 for each and every offense.

"Sec. 14. A fee of 25 cents shall be collected by the commissioner of agriculture, commerce and industries from the seedsmen, person, firm or corporation offering the seed for sale or selling same for each sample tested under the provisions of this act, and the proceeds from such fees shall be paid out of said special fund upon the warrant of the comptroller general, upon the presentation of itemized bills approved by the commissioner of agriculture, commerce and industries.

Smile and be Happy

Smiles should be a part of ourselves every day of the week. Do you know we esteem those persons our best friends who greet us with a smile and a kind word. A community composed of individuals who look always on the bright side of every thing would, in our opinion, be an ideal community. What we need in this life is sunshine, and a great deal of it.

# A Good Fish Story.

Here is a fish story of the 1910 crop published by the St. James Budget. "While Mr. McRorie, an angler visiting Loch Tay, was fishing in the Killin waters with two rods, two salmon took the baits simultaneously and both were secured. The salmon weighed seventeen pounds each." Can any of our fishermen beat that record.

# WILL START SOON

THE POLITICAL POT BEGINS TO SIMMER AND BUBBLE.

When the Different Conventions and Primaries Will Be Held in the Several Counties.

This is election year and the candidates for State officers are very busy going round seeing the dear people and feeling the political pulse. County politics are quiet yet, and very little, if any, canvassing is going on among prospective candidates. So far we have heard no new candidates mentioned for the several county officers except the gentlemen who now most acceptably serve the public in the several offices.

The direct primary of the Democratic party settles all contests for office, from United States senator or governor down to coroner. The machinery of the party is set in motion on the fourth Saturday in April—April 23rd, this year—when the precinct clubs in every county will be called to meet and elect officers, also selecting delegates to the county convention and a member of the county executive committee from each club.

The county convention meets in the court house on the first Monday in May, which this year falls on May 2. The county convention elects a county chairman, a member of the State executive committee and delegates to the Democratic State convention.

The State convention meets in Columbia, in the hall of the house of representatives, on the third Wednesday in May, which this year is the 18th of May. In years of presidential elections, the State convention is important since it selects the delegates to the national convention which nominates the candidates for president and vice president, and the State convention also then elects a member of the national executive committee. But in the years when there is no presidential election, as this year, the work of the convention is apt to be merely a routine declaration of principles.

The State executive committee handles the business of the party. It meets at the call of the chairman—a position held for years by General Willie Jones, the member from Richland county. The State committee arranges for the primary election, the first election to be held on the last Tuesday in August—August 30th, this year—and the second primary, if one be necessary, two weeks later—September 13th, this year. The committee also fixes the schedule for the campaign meetings.

In those years in which there is an election for United States senator there are two campaign parties, one composed of the candidates for governor and all State offices, and the other of candidates for senator, congress and solicitor. Each party must speak in each county of the State. This year there will be no campaign for the Senate.

The State campaign usually opens about the middle of June and lasts until about the middle of August. The indications are that there will be several candidates for governor but few have been announced for the other State offices.

In the race for governor the avowed candidates are: C. C. Featherstone of Laurens; T. G. McLeod of Lee; John G. Richards, of Kershaw. Other possibilities of Richard I. Manning of Sumter; F. H. Hyatt of Richland and Cole L. Bleas of Berkeley. There may be others.

The only announced candidate for lieutenant governor is C. A. Smith of Florence. Both Governor Ansel and Lieutenant Governor McLeod each having served two terms, retire from their respective offices, but the other State officials will stand for reelection, as follows:

Secretary of State, R. M. McCown; attorney general, J. Fraser Lyon; comptroller general, A. W. Jones; State treasurer, R. H. Jennings; adjutant general, J. C. Boyd.

For railroad commissioner to succeed Major John H. Earle the candidates will be numerous including O. C. Scarborough of Clarendon, probably Jas. A. Sommersett of Richland and the inevitable Candler of Tirzah.

Free Advertising Given.

The Newberry Observer says: "If a small merchant has goods to sell or a farmer a few cows or hogs, he has to pay for advertising them; but the Western Union Telegraph company wants to get some facts about its business before the public. What does it do? It sends the notice to its agents and instructs them to have it 'put in the paper, provided it does not cost anything.' As the Observer says 'a lot of paper put it in free while they would make an ordinary citizen pay for similar service. A multimillionaire corporation dead-ends its advertising.'

Smile and be Happy

Smiles should be a part of ourselves every day of the week. Do you know we esteem those persons our best friends who greet us with a smile and a kind word. A community composed of individuals who look always on the bright side of every thing would, in our opinion, be an ideal community. What we need in this life is sunshine, and a great deal of it.

No remedy will deaden the pain or take the soreness from

# Cuts and Bruises

quicker than Noah's Liniment. It is antiseptic and the best pain remedy. One trial will convince you. Noah's Liniment penetrates; requires but little rubbing.

# Here's the Proof

Mr. Edward Ryan, who has been employed at the Old Dominion Iron and Steel Works in Richmond, Va., for about fifty years, makes the following statement: "While working at my trade (iron work) I got bruised and cut frequently, and I find that Noah's Liniment takes all the soreness out and heals the wound immediately. Have also used your remedy for rheumatism with the best results, and recommend it to anyone suffering with aches and pains."

**BARGAINS! BARGAINS!** While they last—A number of slightly used \$95 High Grade Organs for only \$58.50. These organs appear nearly new and are warranted to last a long lifetime. Terms of sale given on application. Write for catalogue, stating terms desired. This is a catalogue of organs in a life time to possess a fine organ at about cost. Answer quick, for such bargains do not last long. Address: MALONE'S MUSIC HOUSE, Columbia, S. C.—Pianos and Organs.

# LEADERS ARE WORRIED.

New York Republicans Admit that the Situation is Serious.

A dispatch from Oswego, N. Y., says that political leaders and legislators, national and State, who were in attendance on the funeral of former United States Senator Thomas C. Platt, found an opportunity for an exchange of views on the political situation at Albany.

The Aldrich-Conger bribery scandal, and the Senate leadership contest were quietly discussed by former Governor Odell, Chairman Woodruff, of the Republican State Committee; Representative Dwight, the Republican "whip" in the lower house at Washington, and representative Sloat Fassett, and other Republican legislators from Washington and Albany.

The delegation from Washington brought word that the feeling in Administration circles favored Hinman's election. Albany retorted that such action was unlikely, and it was hinted that a hitherto unmentioned candidate might be put forth as a compromise. It is apparent that Senator Cobb's supporters, who include Chairman Woodruff and Wm. Barnes, Jr., the Albany leader, intend to press his candidacy at the conference at Albany.

That the situation within the Republican party at Albany is causing grave concern was admitted by the leaders.

# CAUSES DAMAGE.

Lightning Plays Strange Pranks But Hurts No One.

At Somerville, N. J., the telephone, electric light and fire alarm service is crippled as a result of the most severe electric storm ever experienced in this section of New Jersey.

A dozen residences and an equal number of barns and outbuildings were struck by bolts, but no serious fires resulted. The lightning played some strange pranks.

A bolt came down the chimney of the new residence of William Arkenberg and traveled around the dull gilt moulding on the walls throughout the house, leaving it with a surface like newly burnished gold.

In another house a bolt which struck a projecting gable divided into several branches on entering the house and lighted eight small fires in as many different rooms.
